## CRUISING SAILS

### QUANTUM'S TRUSTED PERFORMANCE & RELIABILITY MEETS SUSTAINABILITY

Quantum's new EcoSeries sail line is made of sustainable materials to power your sailing lifestyle. The EcoSeries offers responsible sail choices without sacrificing performance or durability. Available for most cruising boats, EcoSeries cruising sails are manufactured from diverted trash and plastic, recycled fibers, and use lamination processes that are kinder to the environment. Whether you're looking for a perfect day on the bay or cruise a little further, our EcoSeries sails are a win for the planet, too.

### OUR COMMITMENT TO SUSTAINABILITY

At Quantum, we believe that true sustainability comes from changing how we do things. Using recycled materials and improving how we run our facilities is the only path forward. Quantum has long been a champion for reducing our footprint and protecting our environment. Our production facility has been ISO 14001:2015 certified for Environmental Management Standards since 2011, we use recycled material in our packaging, and we've worked to eliminate production waste. We have also worked for years with companies who repurpose our old and extra sails, keeping them out of landfills. In addition to our new EcoSeries sail line, this year, we're taking our commitment even further with more recycled materials in our production chain and assessing ways for our lofts to reduce their energy consumption and waste through recycling programs, making energy-efficient equipment swaps, and supporting green initiatives at local events. We remain committed to continually developing and improving these efforts for a more sustainable future.

2 HIGH-PERFORMING SUSTAINABLE SAILS AND 1 RECYCLED SKIN OPTION FOR OUR FUSION M SAILS

2,336 DIVERTED PLASTIC BOTTLES IN ONE 40-FOOT-BOAT EcoCROSS CROSSCUT MAINSAIL

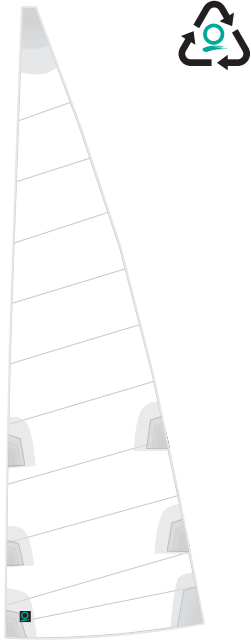

50-100% RECYCLED FIBERS AND MATERIALS

0 SACRIFICE IN DURABILITY AND PERFORMANCE

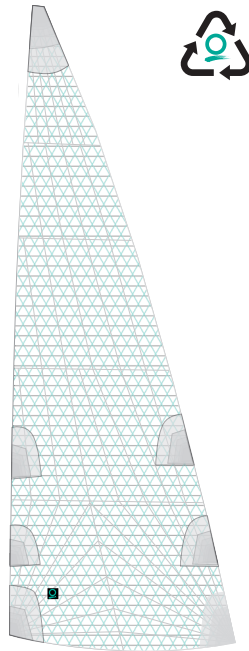

EcoSERIES CRUISING SAILS

EcoCROSS

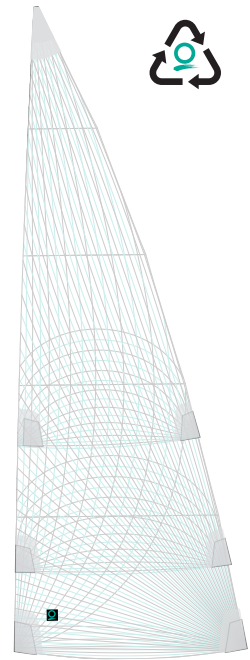

A classic crosscut sail made with up to 100% recycled materials and diverted plastic. With zero sacrifice in durability and performance, EcoCross is the environmentally-friendly option you've been looking for.

EcoTRI CRUISE

A cruising tri-radial sail made from 100% recycled plastic-bottle material with great UV resistance. EcoTri Cruise is specifically designed for modern cruising boats and for sailors interested in performance. The fabric is low-stretch, highly durable, and made without polluting solvents or PFAS chemicals.

FUSION M  
TAFFETA EcoSKIN

A sustainable white taffeta skin for our Fusion M membrane sails is made from 100% recycled fibers and is a perfect option for eco-conscious performance cruisers.
